Design Feedback:

data design

- function specification for predicate and should be at top of template
- mention direction with first letter in upper case for data definition
- missing direction in robot template

Funct Spec

Implementation

- robot-left,robot-forward
- double decomposition, please decompose one thing in one function
- Warning - Library "universe" required but not used

Style

- warning take care of 80 character limit in a line

Positive Feedback:

1. good comments in tests and 100% test coverage
2. function design recipe followed well

Explanation Feedback:

only 1 alt def, think of one more next time
